CENTRAL OFFICE

Ankara- Türkiye

FIELDS OF ACTIVITY

Import & Export

The product supply needs of many construction projects at home and abroad within Aslan Group have created a business volume covering import and export.

With its import and export expertise, Detay was established in 1994 to meet this need.

The leading countries it exports to are China, Brazil and India. Tower cranes, sinks, toilet sets, faucets and ceramics, marble and granite are some of the products that are imported and exported.

Detay initially began its operations by managing the domestic and international import-export activities of products supporting Aslan Group companies, and over time expanded its portfolio to establish a strong, independent presence in the market.
